\* Comment:

Official table of all areas with anchoring buoys on the Croatian Adriatic is available on the Web site of the Croatian Ministry of Sea... <http://www.mmpi.hr/>, and areas are defined with different number of coordinates. Unfortunately the dates of the coordinates are not defined.

It was found, that some areas are defined with the coordinates, based on date Bessel 1841 (used on the official Croatian nautical maps), and some on the date WGS84, used primarily on the electronic plotters.

As the difference on the Adriatic between both dates is about 0,28 minutes (lon) and only 0,01 minute (lat), authors of this document corrected all Bessel 1841 based areas for 16,8 seconds to the west.
